

CIVILIPSA organized National Workshop on Advanced Surveying

Continuing with the tradition of regularizing new Indian Touchstone, Civil Engineering Dept, IES, IPS Academy, organized a workshop on Advanced Surveying on 26th Nov.' 2016. This is the third consecutive year of this workshop. The objective of this workshop is to enhance the ability of students in the field of Advanced Surveying and to get familiar with Modern Surveying Equipments. The event received an audience of around 200 students. Marking the inauguration workshop of its kind, Principal IES, Dr. Archana Keerti Chowdhary, elucidated the key concepts about Surveying. These concepts being - the necessity of basics about the Advanced Surveying Equipments as well as the understanding their role in the Field.

The workshop conducted by Prof. Ashish Nim, elaborated the use of surveying equipment as per industrial expectations. Keeping with the industry trend of using Advanced Equipments, a brief explanation of various types of Instruments like Total Station, EDM, Digital Theodolite, GPS and GIS Software was also given. Presentation ended with a discussion of various innovations and scope in future for Modern Surveying.

Information was also given for upcoming events which include “Practical Demonstration of various surveying equipments.”

These events combined with regular Filed Approach are aimed to motivate the students to understand basics and be prepared for change that is marking the construction industry worldwide.
