IPS ACADEMY
INSTITUTE OF ENGINEERING & SCIENCE
(A UGC Autonomous Institute affiliated to RGPV)

Feedback collection process:

The feedback is taken from various stake holders and is analyzed by obtaining weighted averages for each of the attributes/ parameters. Overall weighted average is also obtained. If the weighted average of one or more parameter is less than 3 on a scale of 0-4, it is presumed that the institute is required to take corrective action. The nature of corrective action to be taken depends upon the parameter/ attributes.

Feedback analysis process:

The software is so designed that the rating for each parameter is cumulatively calculated on a five point scale [4-0], with [4] being the highest rating and [0] being the lowest.

The calculation of weighted averages is illustrated below:

No. of stake holders participated in feedback = N

No. of stake holders who have put tick mark in "excellent" column = X_4

No. of stake holders who have put tick mark in "very good" column = X_3

No. of stake holders who have put tick mark in "good" column = X_2

No. of stake holders who have put tick mark in "satisfactory" column X_1

No. of stake holders who have put tick mark in "unsatisfactory" column = X_0

It is to be noted that $X_4 + X_3 + X_2 + X_1 + X_0 = N$

Weighted average of the parameter $\dfrac{4*X4 + 3*X3 + 2*X2 + 1*X1 + 0*X0}{N}$
