Industry Institute Interaction Cell (IIC)

The institute has a dedicated Industry Institute Interaction Cell (IIC) to strengthen the bond between industry and academia. Under this cell, the institute organises the Industry Institute Conclave. To give students a taste of the practical aspects of the industry, the institute regularly organises industrial tours and visits for students. Our students work on real-world problems in industries.

Under this cell, the Institute has signed MoUs (Memorandums of Understanding) with prominent industries. Industry representatives design the curriculum of the institute's programs. Every department regularly organises Advisory Board Meetings (ABM) and Boards of Studies (BoS). These two bodies have representatives from Industry to fine-tune the academic work of the departments as per industry standards. To train our students to suit industry requirements, our students take on regular internships as a mandatory requirement for completing their degree.

An expert from the industry is teaching some of our full-time courses. We have design centres, Electrical workshops, and Mechanical Workshops. Our state-of-the-art laboratories are equipped with modern instruments. Many of our students have designed solutions to industry problems. Our institute's patent files are in the process of acceptance by the industry. Our faculty members provide online consultancy to industrial units. Our training centre, located at the institute, provides training to people from various industries. The institute has a strong, connected network of alumni base placed in multiple industries.
